Preface My book is intended for university students or candidates in accounting who are required to resolve multidisciplinary integrated cases as part of their studies. What I have written is based on more than twenty-five years of resolving cases; my experience has been gained from university teaching, consulting for accounting firms, and marking professional exams. The ideas you will find in this book are drawn from real-life student work, responses, comments and questions. I spent over five years writing the original edition of Accounting for success, first bringing together a great number of observations and then proceeding to their detailed analysis. My objective has been to facilitate the case learning process by using a practical and well-structured approach. Experience has taught me that resolving multidisciplinary cases within a specific context is one of the greatest challenges in the study of accounting. By opting for a clear, direct and concise approach, I have sought to present key elements in a dynamic and proactive manner, with the occasional dash of humor. My preference has been to adopt a more chatty style, interspersed with illustrations, rather than to simply present the reader with a formal list of concepts. This explains the many recommendations, examples and tables that I use to clarify and explain my arguments. Case analysis and resolution is an activity that teaches you to exercise your judgment in a variety of situations, something that most certainly adds a positive dimension to accounting studies. Sylvie Deslauriers, PhD.
