*****.Stroke and brain injury can be the most traumatic experience in a person s life. It not only changes the entire world for the patient but also takes a colossal toll on the patient s family members. A major stroke can confine a person to bed, or even kill him or her due to its consequences. If the stroke is acute, and the individual is still alive, the person keeps thinking he or she might die anytime soon. The individual keeps brooding about things he or she had planned for the future that perhaps will not come to fruition anymore.A person can lose his or her memory, voice, motor skills, languages, swallowing ability, vision, and be under constant pain. The list goes on and on. Unfortunately, somebody who has had a massive stroke and lost his or her voice cannot even express how he or she is feeling internally.Read this book to get latest research based and data driven information about this debilitating disease, and how to preempt stroke in most situations.Here are some of...
